TWO POST HYDRAULIC LIFT

Advantages

PNEUMATIC OPERATING SYSTEM FOR SAFETY LOCK

ELECTRONIC OPERATION OF LIFTING AND LOWERING

DOUBLE-SIDE BUTTON OPERATION CONTROL

Basic information

- LOADING CAPACITY 8000 kg
- SYMMETRIC DESIGN
- HYDRAULIC DRIVE HIGHLY EFFICIENT AND ECONOMICAL
- ERGONOMIC POWER PACK COVER
- HEIGHT LIMIT CONTROL SWITCH TO PROTECT THE CAR
- VARIABILITY IN POSTS EXTENSIONS 4350 mm, 4700 mm AND 5000 mm
- SET OF TRUCK ADAPTORS 60 mm AND 120 mm
- EASY OPERATION
- THE FUNCTION SHORT DROP BUTTON ON THE RIGHT COLUMN ALLOWS THE PRECISE LOWERING TO THE SPECIFIED LOCATION
- CZECH MADE
- LIFTS ARE DESIGNED AND MANUFACTURED IN ACCORDANCE WITH ČSN EN 1493:2010

Commercial vehicles and trucks

TWO POST HYDRAULIC LIFT

Lift assembling

- AMI lifts are typically delivered pre-assembled and packed in heavy transport resistant frame.
- To put on the hand the lift correctly is particularly difficult task. Therefore is strongly recommended that the lift is assembled, fixed on the floor and adjusted by specialists certified by producer.
- The building roof must be higher about 100mm than the total lifting height.
- AMI lifts can be fixed only on top quality concrete floor representing the high quality concrete (the minimum concrete quality mark C20/25 according to DIN 1045:2001-07) slab at:

160 mm AMI 3,0 ECO LINE

200 mm AMI 3,6 CLASSIC / AMI 4,0 VARIANT

300 mm AMI 5,5 VAN

230 mm AMI 8,0 BUS

alternatively, on the foundation of the same concrete having the dimensions 1200 by 700 mm (1200 x 1200 mm for AMI 8,0 BUS) under each post and sunk to a minimum depth of 500 mm indoors (800 mm for AMI 8,0 BUS) and 800 mm outdoors (1000 mm for AMI 8,0 BUS).

- There must be an electricity line available at the site complying with the following specifications: TN-S 3/N/PE AC 400V/230V/50 Hz. This power line must be provided with the 16/3/B (20/3/B for AMI 5,5 VAN and AMI 8,0 BUS) amperes contact breaker fuse complying with the characteristics of the electric motor of the lift. Power mains must be executed by a flexible cable type H05VV-F.
- The oil tank of the lift must be filled with the oil OHM 32 (the level of filling can be checked through the transparent plastic tank).
